DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 02/44314. See composition E1 on p. 19. The composition is disclosed as comprising two continuous, transparent phases which, upon shaking, temporarily form a creamy emulsion (para. under Table 1). The viscosities of the inventive compositions are disclosed as being at least 5 mPa.s (= 5 cP) (p. 15, top). The examiner takes the position that, due to the presence of the surfactant, some amount of water will be solubilized in the organic phase. Because the organic phase is transparent, it is a microemulsion. The perfume, being organic, will be solubilized there as well. The compositions are described in the abstract as being useful for cleaning hard surfaces, which are non-porous.

3. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through
